RESIDENCE 7®

CASE STUDY

Mr & Mrs Sharpe, Norfolk

Your R7

“We wanted to replace the old, rather outdated PVCu windows we inherited when we bought our house. We had initially discounted PVCu replacements, but whilst searching Pinterest for ideas we came across some pictures of windows that we thought were wood, but turned out to be Residence Collection windows.

We loved the look of the whole Residence Collection, however after speaking with our installer, we came to realise that Residence 7 was the best fit for us due to the depth of the frame being 75mm. We had initially planned to replace the windows in stages as they look very expensive, however they are actually a very cost effective solution and we could replace all the windows in one go - certainly worth the investment!

They have transformed the look of the house - we're still new in the village, but we've had several people come up to us and say how lovely the windows look, they have all thought they were wood, but an added bonus is we don't have to paint these!

We would definitely recommend to a friend.”

“ they have
transformed
the
look of
our
house!

The Sharpes, 2017

”

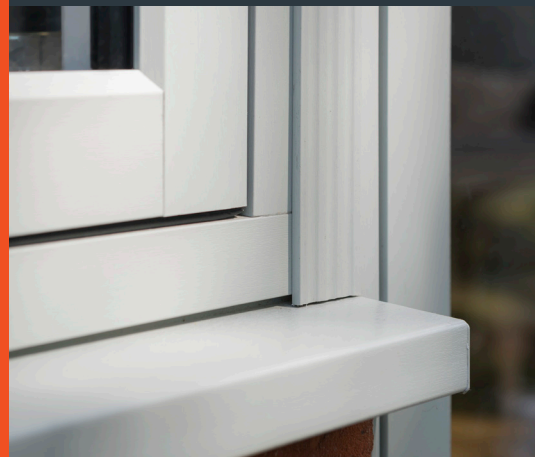

Mr and Mrs Sharpe chose R7 windows and french doors in Painswick foil to the outside, with chalk white (unfoiled) finish inside.
